

October 17, 2023 Statement

Popular Front for the Liberation of Palestine

Retrieved from <https://t.me/PalestineResist/15497>

Today, Tuesday, the Popular Front for the Liberation of Palestine denounces any Arab or Palestinian participation in meetings with the American war criminal Joe Biden, the main driver of the war of genocide against our steadfast people in the Gaza Strip.

The blood of the innocent martyrs in the [Al-Ahli Arab] Al-Maamadani Hospital massacre committed by the zionist enemy drips from the hands of the American war criminal Joe Biden and his zionist allies.

The decision to bomb the hospital was issued by the same zionist war room in which the criminal Joe Biden was present today during his visit to his war criminal allies.

These massacres, which exceeded any other, were the result of the inherent racist criminal tendencies of the leaders of the zionist entity and their allies in the American administration and the leadership of the European Union.

The minimum respect for Arab dignity and identity is for Arab officials to adopt a unified stance by withdrawing from the summit of shame with Biden, the killer of children, women, and the elderly; to boycott the American administration; to expel its military bases; and to close its embassies in the region. This must of course be preceded by a complete closure of the embassies of the state of aggression and zionist war crimes.

The Front calls on the masses of our people in the West Bank, Al-Quds, and the territories of 1948 to move and ignite a comprehensive intifada in the face of this criminal enemy and the herds of its settlers who are committing massacres against our people and our people in the Gaza Strip.

The Front also calls on the Arab masses to besiege the American embassies, the embassies of the European Union countries and the zionist entity, and their representative offices in all Arab capitals. It also addresses the same call to the forces around the world in solidarity with our people, to escalate actions and struggles against the aggression and against the embassies of the zionist entity, the American administration, and the European powers that are partners in this aggression.

This is the battle of Palestinian existence, Arab existence, and dignity. Half-hearted positions in it cannot be accepted. Our people will remain steadfast, proud, and tall, defending their land and their rights, the dignity of the Arab nation and the essence of its existence.
